Price 9,888.00
PER SESSION

DESCRIPTION

HIFU (high-intensity focused ultrasound facial treatment) is a procedure that is very safe to use because its feature consists of a non-invasive process for facial issues about premature aging, this treatment provides good benefits for lifting a shape face without undergoing surgery.

This visage enhancement can able to tighten the skin in the lower part of the face such as the neck and also lessen the loose skin under the chin, lift wilting of the eyelids, or every corner of the eye area which thoroughly give a benefit to younger-looking vibe. . (Actively operated in SM North Annex and in weekdays only)
