

# EMERALD Z

ICONIQUE  
REVOLUTIONARY BEAUTY

It's an over-the-counter LED infrared device that emits energy in the red & infrared regions of the spectrum. The device is used for the treatment of multiple signs of aging to reduce facial lines, improve the skin's appearance and relieve joint pain.

The Emerald Z beauty device utilizes infrared LED technology to deliver heat therapy through a handle with an electronic control panel. It features 30 red lights at 625 nm and 4 far-infrared lights at 852 nm, as well as a glass sensor probe capable of transferring heat of up to 50.5 degrees celsius to the deeper layers of the skin.

The red light heating beauty device, which employs infrared LED technology, delivers continuous heat therapy through a handle with an electronic control panel. It comprises 30 red lights at 625 nm, 4 far-infrared lights at 852 nm, and a glass sensor probe that can transmit heat up to 50.5 degree celcius to the deeper layers of the skin.

Treats multiple signs of aging to reduce facial lines, improve the skin's appearance and relieve joint pain.

A solution for reducing wrinkles that is both easy to use and made from technology that is backed up by science.

designed to minimize the appearance of skin discoloration and age spots, enhance the overall complexion, and improve skin tone and texture. By increasing collagen and elastin, it can also help create a more youthful-looking appearance.
