

# ICONISHIELD

ICONIQUE  
REVOLUTIONARY BEAUTY

The Iconi-Shield Device, designed for facial beautification uses natural light waves, which are transmitted by LEDs into the skin.

Introducing the Iconishield Device, the ultimate solution for achieving radiant and youthful-looking skin. This state-of-the-art device uses natural light waves, transmitted by LED, to activate photoreceptor in the skin cells. This process produces energy that is then absorbed by the skin's components, resulting in a more beautiful and even complexion. With Iconi-Shield Device, you can say goodbye to dull and tired-looking skin and hello to a radiant and youthful appearance.

Easy to use with one-key design and simple 15-minute daily routine.

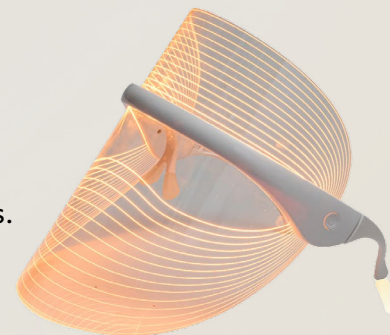

Lightweight and rechargeable, allowing for convenient use in various locations.

Suitable for all skin types with a variety of color options.

Wavelength of red light varies from 620 to 750nm and it facilitates blood circulation, accelerates metabolism, generates collagen, helpful to the wrinkle care and the skin improvement.

Wavelength of blue light varies from 476 to 495nm and it removes propionibacterium acne, is helpful to the acne care by improving the environment in the hair follicle.

Wavelength of orange light varies from 590 to 620nm and it improves the function of oxygen exchange in the cells, accelerates the blood circulation together with fading the pigments therefore, is helpful to improve to soften skin.
